

## **Sprint Plan 2:**

### User Stories:

1. As a user, I would want to be able to create/enter a room, which other users can also enter using a code. (13)

### Tasks:

- Create a swipe up panel for room page
  - Connect the Join room to the room page
  - Create sliders for users to adjust distance
  - Set up room implementation in flutter with firebase
  - Display yelp results on slideup panel
  - Set up drawer in room to hold user info and settings
- 
2. I would like a list of possible locations to be displayed based on the locations of the people. (13)
    - a. Interface with the Yelp API
    - b. Connect with backend
    - c. Add search bar to search for yelp categories
